**ARTICLE, “LIVE YOUR PASSION”, “THE GAME OF LIFE & SUCCESS – STEPS TO SELF  
MASTERY & HAPPINESS”, BY STEVE KRUMMECK**

“Follow your bliss and the Universe will open doors for you where there were only  
walls” - Joseph Campbell

Do you ever ask yourself the following? Why do I experience little or no joy in my  
life? Is being successful really worth it? Who am I, where am I going, and what do I  
want out of life? How can I contribute more to mankind? Am I **pursuing my passion**?

Your answering these questions is bound to bring substantial insights to the fore.  
Many of these questions will be referred to as you ‘walk’ through the steps in my  
articles, but more so in my book, “The Game of Life & Success – Steps to Self  
Mastery & Happiness”. Having said this, I encourage you to take some time, get a  
journal out, reflect on these questions, and journal on what comes up for you. This  
process is likely to play a **substantial** role in how your life unfolds going forward,  
provided you **take action** on what comes up for you.

So, the next step (refer to previous articles for the previous steps) to self mastery  
and bringing about phenomenal results in your business / organisation, career,  
interpersonal relationships, and life, is for you to **live your passion**

## **ARTICLES OF INTEREST – EFFECT OF LEADERSHIP STYLE ON JOB RELATED TENSION & PSYCHOLOGICAL SENSE OF COMMUNITY IN WORK ORGANISATIONS**

This study focused on the effect of leadership style on job-related tension and psychological sense of community in work organizations. The study made use of two hundred selected workers from four manufacturing organizations in Lagos state of Nigeria. Three instruments were used to generate data for the study namely Supervisory Behavior Description Questionnaire (SBDQ), Job-related Tension (JT) and Psychological Sense of Community Questionnaire (PSCQ). Data collected was analyzed with t-test for independent groups and 2x2 Analysis of Variance (ANOVA). Five hypotheses were tested and results shows that workers under democratic leadership style do not experience higher job-related tension than workers under autocratic leadership style. Also, workers under autocratic style of leadership do not experience higher sense of community than workers under democratic style of leadership. Moreover, result revealed that female workers do not experience higher job-related tension than male workers under autocratic leadership style. Furthermore, no significant difference was found in the level of psychological sense of community of male and female workers under democratic style of leadership. Finally, sex status does not have any significant main effect on job-related tension. The results were discussed and recommendations were made based on the findings of this study.
